

Solidago ohioensis

Ohio Goldenrod

Flowers in flat-topped clusters. One of the first goldenrods to bloom. Prefers moist sites. Goldenrods do not cause hayfever! They bloom at the same time as ragweed, a major offender.

Suggested companions: meadowsweet (*Spiraea alba*), blue vervain (*Verbena hastata*), fowl manna grass (*Glyceria striata*), Virginia wild rye (*Elymus virginicus*), blazing star (*Liatris spicata*)

Plant Type: Wildflower

Size: 2-5" H
 W

Water Tolerant: Somewhat

Habitat:

Shrubby Wetland
Wet Meadow
Riverbanks

Soil: Average Garden Soil
Very Damp/Wet
Rich Moist
Clay

Exposure: sun

Flower Color:
Yellow

Bloom Time:
July
August
September

Plant in:

Groundcover: No

Other Attributes:

Butterfly attracting
Bird attracting
Deer resistant
Fall color
